**Mr. Maciej Karol Kotyrba
Internship Student from
IESTE**

**Q: Is this your first time in
Thailand?**

A: Actually this is my third time in Thailand. First time I spent sometimes in China before. When I stayed in China, I took the trip to the Southeast of Asia like Thailand, Malaysia, and Singapore. So I didn't have much time for Thailand. Still I spent time here for couple of days and it was amazing for me. I feel that I have to come back here. Then I really wanted to choose for the internship for example like IESTE but there was no offer for me, for Thailand. So I chose India, the closest place to Thailand. I chose India because after sometimes I could go to Thailand. And I did. I spent three months in India and I went to Thailand again for travelling, more travelling. That time I stayed in Thailand for one month just to travelling. I went to Chiang Mai, to the South, Koh Tao, to do the scuba diving course there. It was so amazing. I think people still taking good care with the environment there. When I was in Koh Tao, doing the scuba diving course, some day, we would say that we will have the diving course with to picking up the trash from the reef. I joined the activities and it was free. We only paid for the boat rental and we went to reefs with lots of rubbish, we picked up the rubbish. It was something like environment volunteer action. I really like that. You could do scuba diving for free and at the same time doing something good. It was really nice.

Q: How do you apply to do the internship with Faculty of Architecture and Interior Design at KMUTNB?

A: I applied through IESTE. When I was applying to India, I was hoping to apply to do internship in Thailand, but there was no offer for me in Thailand that time. This is my

third internship with IESTE. The first time I went to China, the second time in India and finally I came to Thailand. It was my dream to do internship in Thailand.
